Features & Benefits

■ Communications

The SPC system provides a powerful portfolio of communication options. The system is capable of offering IP based, 50136 compatible communications. Along with traditional analogue communications.

■ Commercial

The integrated commercial capability enables you to easily configure and operate commonly used procedures for commercial applications such as intelligent handling of common areas, and additional functions for system monitoring.

Advanced Features

■ User definable functions

The functionality of the SPC system can be extended to fit specific customer or market requirements. Various triggers from the system can be logically combined in order to activate specific processes

■ Configuration

The SPC family provides a common interface for configuration across the range. Each system can be configured locally from a keypad or the connecting directly to the on board web server. Remotely the web server provides the ability to support customers and alter functionality.

■ Cause and Effects

The functionality of the SPC system can be extended to fit specific customer or market requirements. Various triggers from the system (e.g. zones, areas, user identifications, schedules) can be logically combined in order to activate specific processes.

■ Remote Access anywhere

Using SPC Connect any IP enabled SPC panel can be remotely accessed. Providing remote access to customers to the web interface and mobile app access.

■ International approvals

Compliance with international standards – such as

- EN, SES
- NF
- INCERT
- IMQ

It is crucial to ensure that security systems are installed professionally and remain reliable.

■ User management

The system provides you with the ability to control user's intrusion and access rights. SPC offers support for a range of access readers. User's rights can be restricted by time, day or area.
